

Module Title

a4a Training Course

Danai Mantopoulou Palouka & Alessandro Ligas

2026-09-13

Outline

- Point 1
- Point 2
- Point 3

Main Content Slide

Content here.

With a sub-heading

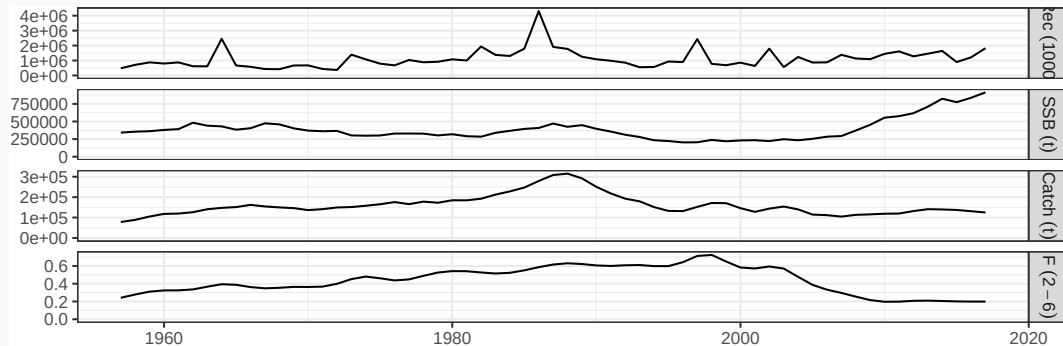

More content.

Code Example

```
# Example R code
```

```
data(ple4)
```

```
plot(ple4)
```

Key Message Slide

Key message

a4a has no process error — residuals are the main tool for diagnosing model fit and guiding submodel configuration.

Exercise

1. Load your own data
2. Create an FLStock object
3. Check the dimensions and units
4. Plot the stock

i Optional Geeky Stuff

Detailed mathematical content goes here.

$$\mathbf{y} = \beta_0 + \beta_1 \mathbf{x} + \epsilon$$

Keep these slides at the end of the module so they can be shown or skipped without breaking the flow.

Two-Column Layout

Left column

- Item 1
- Item 2

Code on the right

```
sca(stk, idx)
```

Summary

- Takeaway 1
- Takeaway 2
- Takeaway 3

Hands-on Session

Now it's your turn! Work on your own data.

Objectives for this session:

1. Objective 1
2. Objective 2
3. Objective 3

Come back for questions at any time.
